

Issue Date: November 21, 2019

Topic: Pay Pool Analysis Tool 2019 v4.xlsm

Discussion: Changes are driving a new release of the Pay Pool Analysis Tool (PAT)

1. Correction to Formula in Distribution by Group Tab: On the Distribution by Group tab, the formulas in Column S (Rating of Record Distribution 5) were pointing to the wrong column, Column O instead of Column P. This caused the cell to produce an erroneous statistic for Rating of Record Distribution 5.

2. Formatting Changes

- Some of the formulas caused display errors (#VALUE) due to formulas not entered as an array in the Payout Statistics tab.
- Some of the Wildcard columns were formatted as \$ instead of General in the Data tab.

Results: The PAT v4 corrects computation errors for the Distribution by Group tab and fixes the formatting issues in the Payout Statistics tab and the Data tab.

Solution: The new version of the PAT v4 is available for download from pay pool notices.

Action: Pay Pool Administrators: Please go into the pay pool notices module located in CAS2Net, to download “**2019 Pay Pool Analysis Tool v4.xlsm**”. You will use the newer version of the tool the next time you do a download from Offline Interface

Note: If you have any questions, please contact your local AcqDemo POC or Component POC first and if the issue is system-related, email the AcqDemo Program Office,
